Table of Contents for Agile Playbook Template

01 Agile Overview

- Key Principles of Agile Manifesto for Product Development
- Determine Agile Process Delivery Framework
- Key Phases in Agile Product Development Lifecycle
- Addressing Iteration Workflow for Agile Project Development
- Developing Agile Project Management Workflow

02 Agile Development Strategies

- Developing Agile Framework and Practices through Scrum
- Developing Agile Framework and Practices through Kanban

03 Essential Components of Agile

- **Product Vision Board**
 - Developing Agile Vision Board for Effective Product Development
- **User Story**
 - Addressing Effective User Story in Agile Product Development
 - Addressing User Story Mapping Technique
- **Work Prioritization**
 - Determine Work Prioritization Ranking for Product Development
 - Essential Techniques for Task Prioritization
- **Agile Sprints**
 - Various Sprints Required for Agile Product Development
 - Addressing Various Events Associated to Agile Project Management

Determine Agile Process Delivery Framework

This slide provides information regarding development of agile framework including align, prepare and deliver.

Align

- Agile team will develop shared understanding of project vision, goals, values and expectations
- Prepare team agreements to address how we work, communicate, resolve conflict etc.
- Add Text Here
- Add Text Here

Prepare

- Focus on building, estimating and grooming product backlog
- Add Text Here
- Add Text Here
- Add Text Here
- Add Text Here

Deliver

- Transforming user requirements into valuable, tested and potentially shippable product
- Follow Plan-Do-Check-Act cycles for product development
- Focus on product inspection, testing and adapting required changes through several sprints
- Add Text Here

Align

- Determine Vision & Goal
- Create Working Agreements
- Set Technical Expectations
- Form & Charter the Team

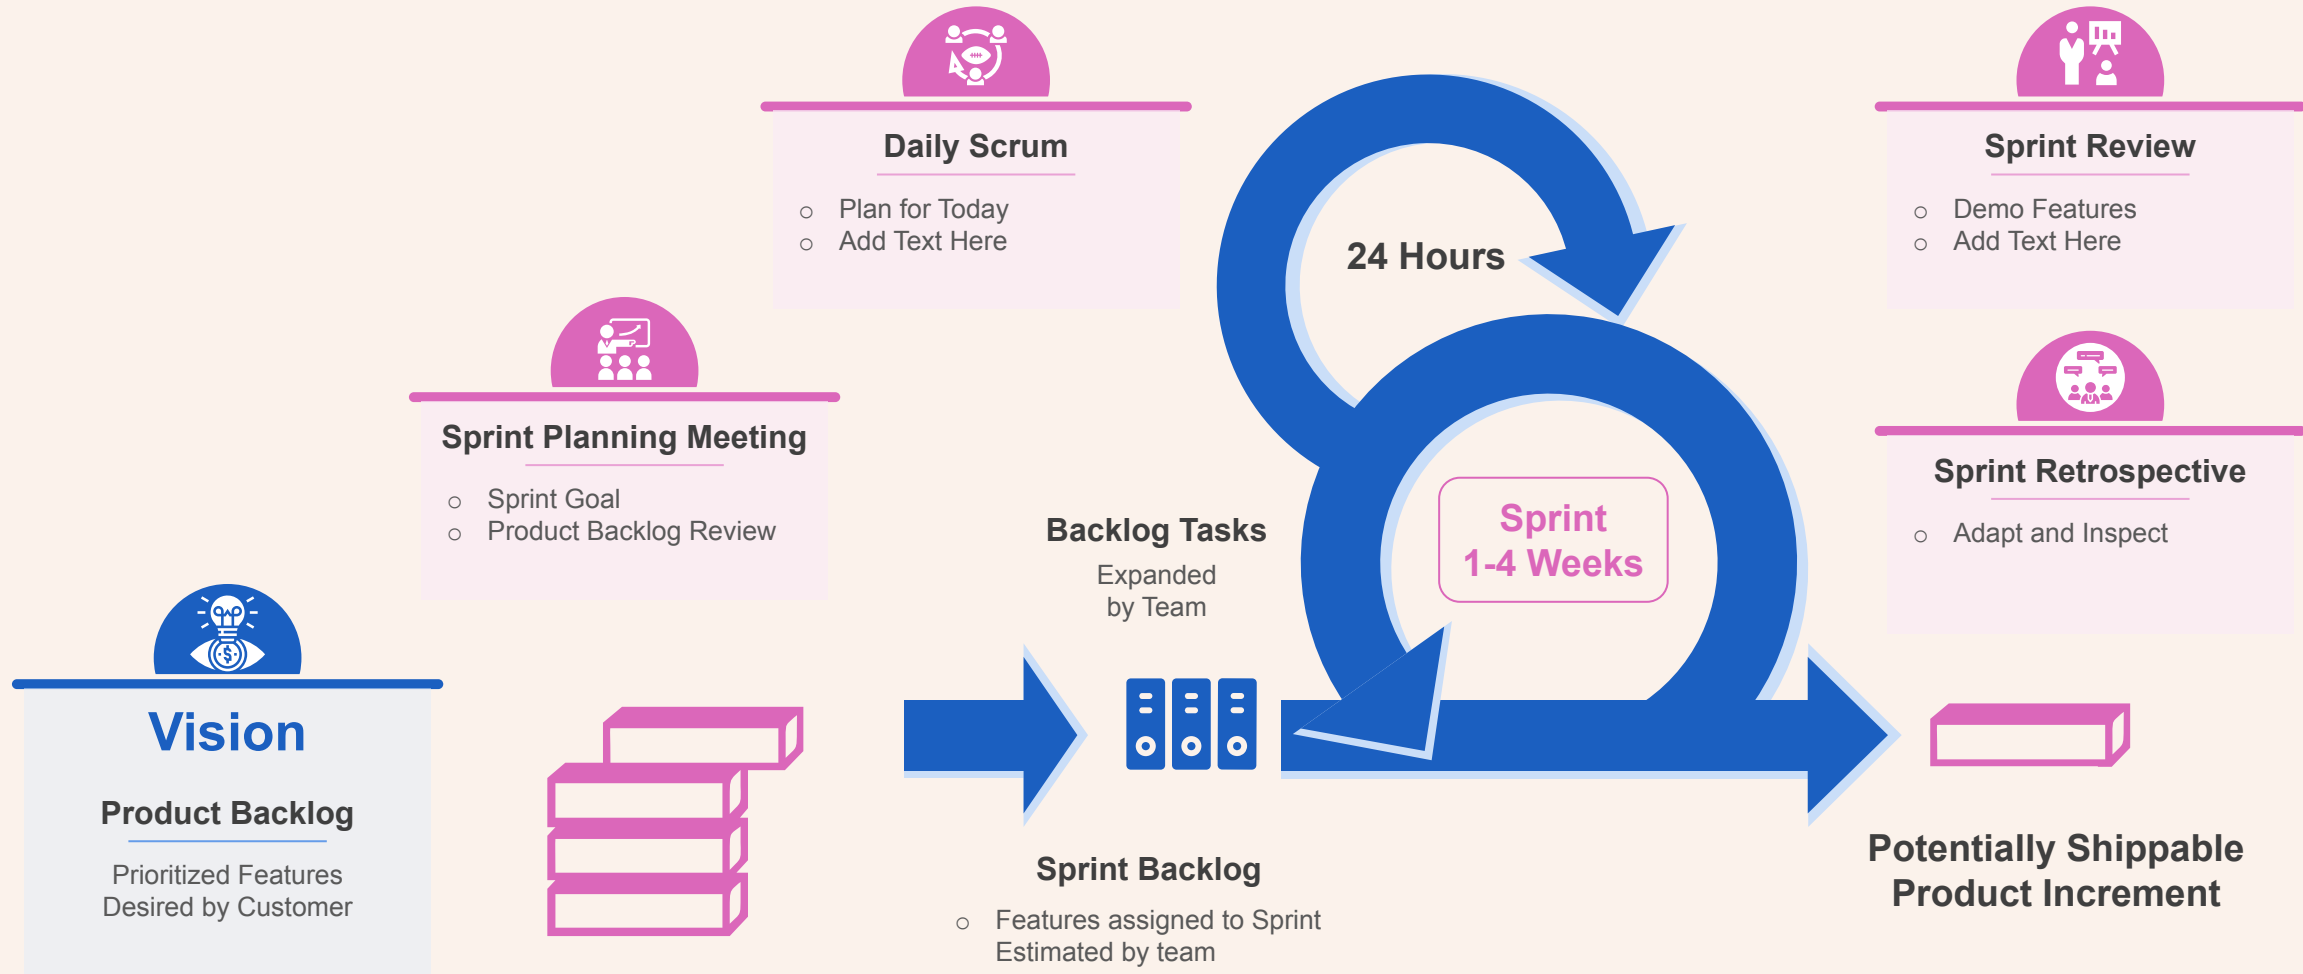

Prepare

- Product Plan & Backlog
- Estimate & Prioritize Work
- Plan Initial Sprint
- Create Initial Infrastructure

Developing Agile Project Management Workflow

This slide provides information regarding agile project management workflow for developing agile product.

[Click here to get the PPT template!!](#)

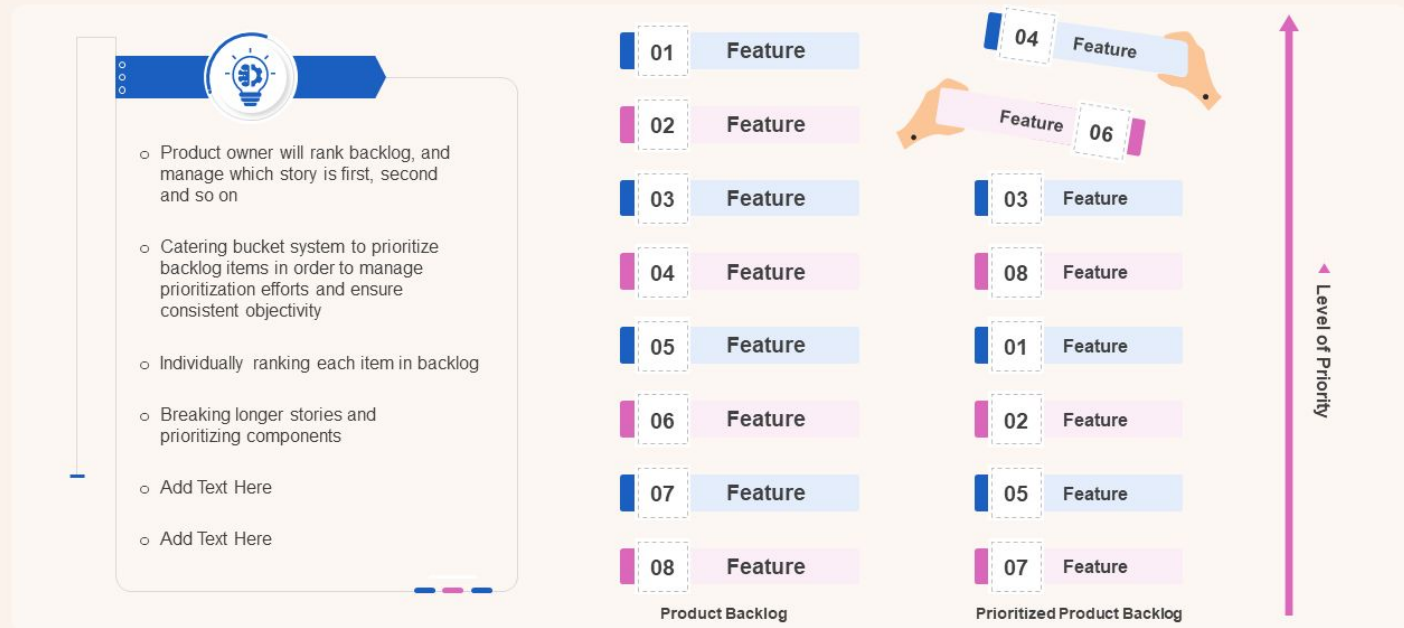

→ **An agile playbook** is a collection of software development standards and methods.

→ It assists a team in improving their working methods.

→ This, however, does not happen quickly, and it takes time and work to design such a paper.

Essential Techniques for Task Prioritization

This slide provides information regarding essential techniques for task prioritization with ranking each item in product backlog.

This slide is 100% editable. Adapt it to your needs and capture your audience's attention.

- **Agile vision board** aids in the description, visualization, and validation of your product vision and strategy.
- It covers the target audience, needs, essential features, and company goals, and it also includes a simple checklist to help you apply the tool efficiently.

Developing Agile Vision Board for Effective Product Development

This slide provides information regarding agile vision board for effective product development by capturing vision, target group, needs, product and business goals.

Vision
Brief, Inspiring goal for the product encapsulating the big Idea & Motivations

Target Group
Who will the Product Serve?
Users
o Product Managers
o Product Owners
Customers Mid-size to large enterprises

Needs
What problem should the product solve for the target group?
o Easily integrated user experience feedback into product backlog
o Better user interface
o Add text here

Product
How will our product meet the needs of the target group? (feature, core ideas)
o Real time visualization
o Provide guidance and template
o Add text here

Business Goals
How will the product benefit the company?
o Cost reduction
o Developing new revenue stream
o Add text here
o Add text here

→ **Components of Product Vision Board**

- 01 **Vision** – Depict overall objective and reason for product development
- 02 **Target Group** – Capture target market or market segment that will be benefitted by product offered
- 03 **Needs** – Capture product's value proposition and how it will handle user's concerns
- 04 **Product** – Address features of offerings that align with its unique selling proposition
- 05 **Business Goals** – Address benefits associated with offerings for company which is investing in it

This slide is 100% editable. Adapt it to your needs and capture your audience's attention.

→ The process of creating a product utilising the Agile methodology is referred to as agile product development.

→ **Agile product development divides** the project into small development cycles known as sprints.

→ Product teams present a working product to consumers after each iteration in order to gather feedback and make changes as needed.

Addressing Effective User Story in Agile Product Development

This slide provides information regarding effective user story in agile product development with its purpose, six essential criteria, requirement and audience.

This slide is 100% editable. Adapt it to your needs and capture your audience's attention.

In agile, who develops the product vision?

- The Product Vision captures everyone's shared understanding of the aim of producing the product.
- It is established by the Product Owner and serves as a guide for the Scrum Team.

What exactly is an Agile project purpose statement?

- The agile mission statement is a brief and to-the-point summary of the entire agile project.
- In an agile context, this mission statement is one of the first things generated.

What is the definition of task in Agile project management?

- Tasks are used to further break down user stories.
- Tasks are the lowest unit of work tracked in scrum.
- A task should be accomplished by one member of the team, though the team may choose to work in pairs.
- Each user narrative will typically have numerous tasks associated with it.

What are the four agile pillars?

The Agile Manifesto is comprised of four core values:

- Individuals and interactions take precedence over processes and instruments.
- Working software is preferred over extensive documentation.
- Customer collaboration is preferred above contract negotiation.
- Responding to change by following a strategy.

About Us

- **SlideTeam is a premier Research, Consulting and Design agency that develops and templatizes industry processes and best practices, frameworks and models across all industry and verticals to help customers present their strategies effectively and convincingly.**
- **In addition, Slide Team compiles data and statistics from thousands of sources over a wide range of topics to help customers make intelligent decisions. We develop and present our research in the form of fully editable PowerPoint templates to make it easy for our customers to create presentations based on their individual requirements.**
- **With a large team comprising of Research Analysts, Statisticians, Industry Experts and Designers spread over 6 countries, SlideTeam now hosts the world's largest collection of Ready to Use PowerPoint templates on all topics and industries.**
- **Our team consists of professionals from Fortune 500 companies and Top Tier consulting firms involved in the process of researching and designing over a million slides that are available for our users on a subscription basis.**
- **To Contact Us and set up a Live Product Demo join us [here](#) .**
