FAQs

What is the purpose of a progress chart?

➔ A progress chart is a graph that shows how far you've come towards achieving a specific goal.

➔ The chart allows you to track and prioritise your goals, providing critical information for strategic decision-making.

What is the progress bar's minimum and maximum value?

➔ The progress bar is initialised with a minimum and initial value of 0 and a maximum value of 100 by the no-argument function Object() { [native code] }.

What should I do to make my progress bar circular?

➔ Step 1: The Circular Progress Bar's basic structure. The basic structure of the Circular Progress Bar was created using HTML and CSS.

➔ Step 2: Half of the basic CSS circle progress bar.

➔ Step 3: Complete the other half of the Circular Progress Bar.

➔ Step 4: In the Circular Progress Bar, enter a percentage.

What is the progress bar's value range?

➔ A progress bar will display a value between 0 and 100 (inclusive); however, both the minimum and maximum values can be adjusted to set any range of values required.

What is the difference between a progress bar and a metre?

➔ The progress bar provides real-time feedback on the status of a workflow or action.

➔ When there is a known minimum and maximum value, a metre is used to display a value in a range (scalar measurement).
