Digital products and solutions

This slide depicts four product categories which include software, products, platforms, and others. Key solutions under these categories are remote meeting software, data encryption tool, operating system, simulation software, antivirus protection, surveillance infrastructure, engineering design tool, and source code development platform

Software

- Remote meeting software
- Data encryption tool
- Operating system
- Simulation software
- Utility tool
- Add text here

Products

- Antivirus protection
- Surveillance infrastructure
- Engineering design tool
- Visual enhancement tool
- Add text here

Platform

- Work monitoring tools
- Resource management platform
- Co learning platform
- Source code development platform
- Add text here

Others

- Application development center
- Community engagement space
- Add text here
- Add text here

Software development expertise

The slide highlights four domains of exclusive expertise provided by company which include IoT development, Enterprise Solution, Minimum Viable Product Development, and SaaS Development.

IoT Development

- IoT application development
- Device connectivity control
- IoT device management
- Data visualization
- IoT data analytics
- IoT consulting service

Enterprise Solution

- Enterprise information portals
- Document management systems
- Workflow management systems
- Order monitoring & processing systems
- Add text here

Minimum Viable Product Development

- MVP development
- Technical planning & assistance.
- Sharing expertise
- Technical consultations
- Add text here

SaaS Development

- SaaS development
- SaaS product prototype
- UI/UX design
- SaaS product QA/QC
- Support and development

Customized services

The slide showcases four areas of services from our experienced team of engineers which are software consultancy, UX/UI Design, Quality Assurance and Code Audit.

Software Consultancy

“Detailed software development report form our software experts”

Quality Assurance

“Complete application audit for security and quality along with resolution services”

UX/UI Design

“Designing of UI/UX for websites and mobile applications specific to client needs”

Code Audit

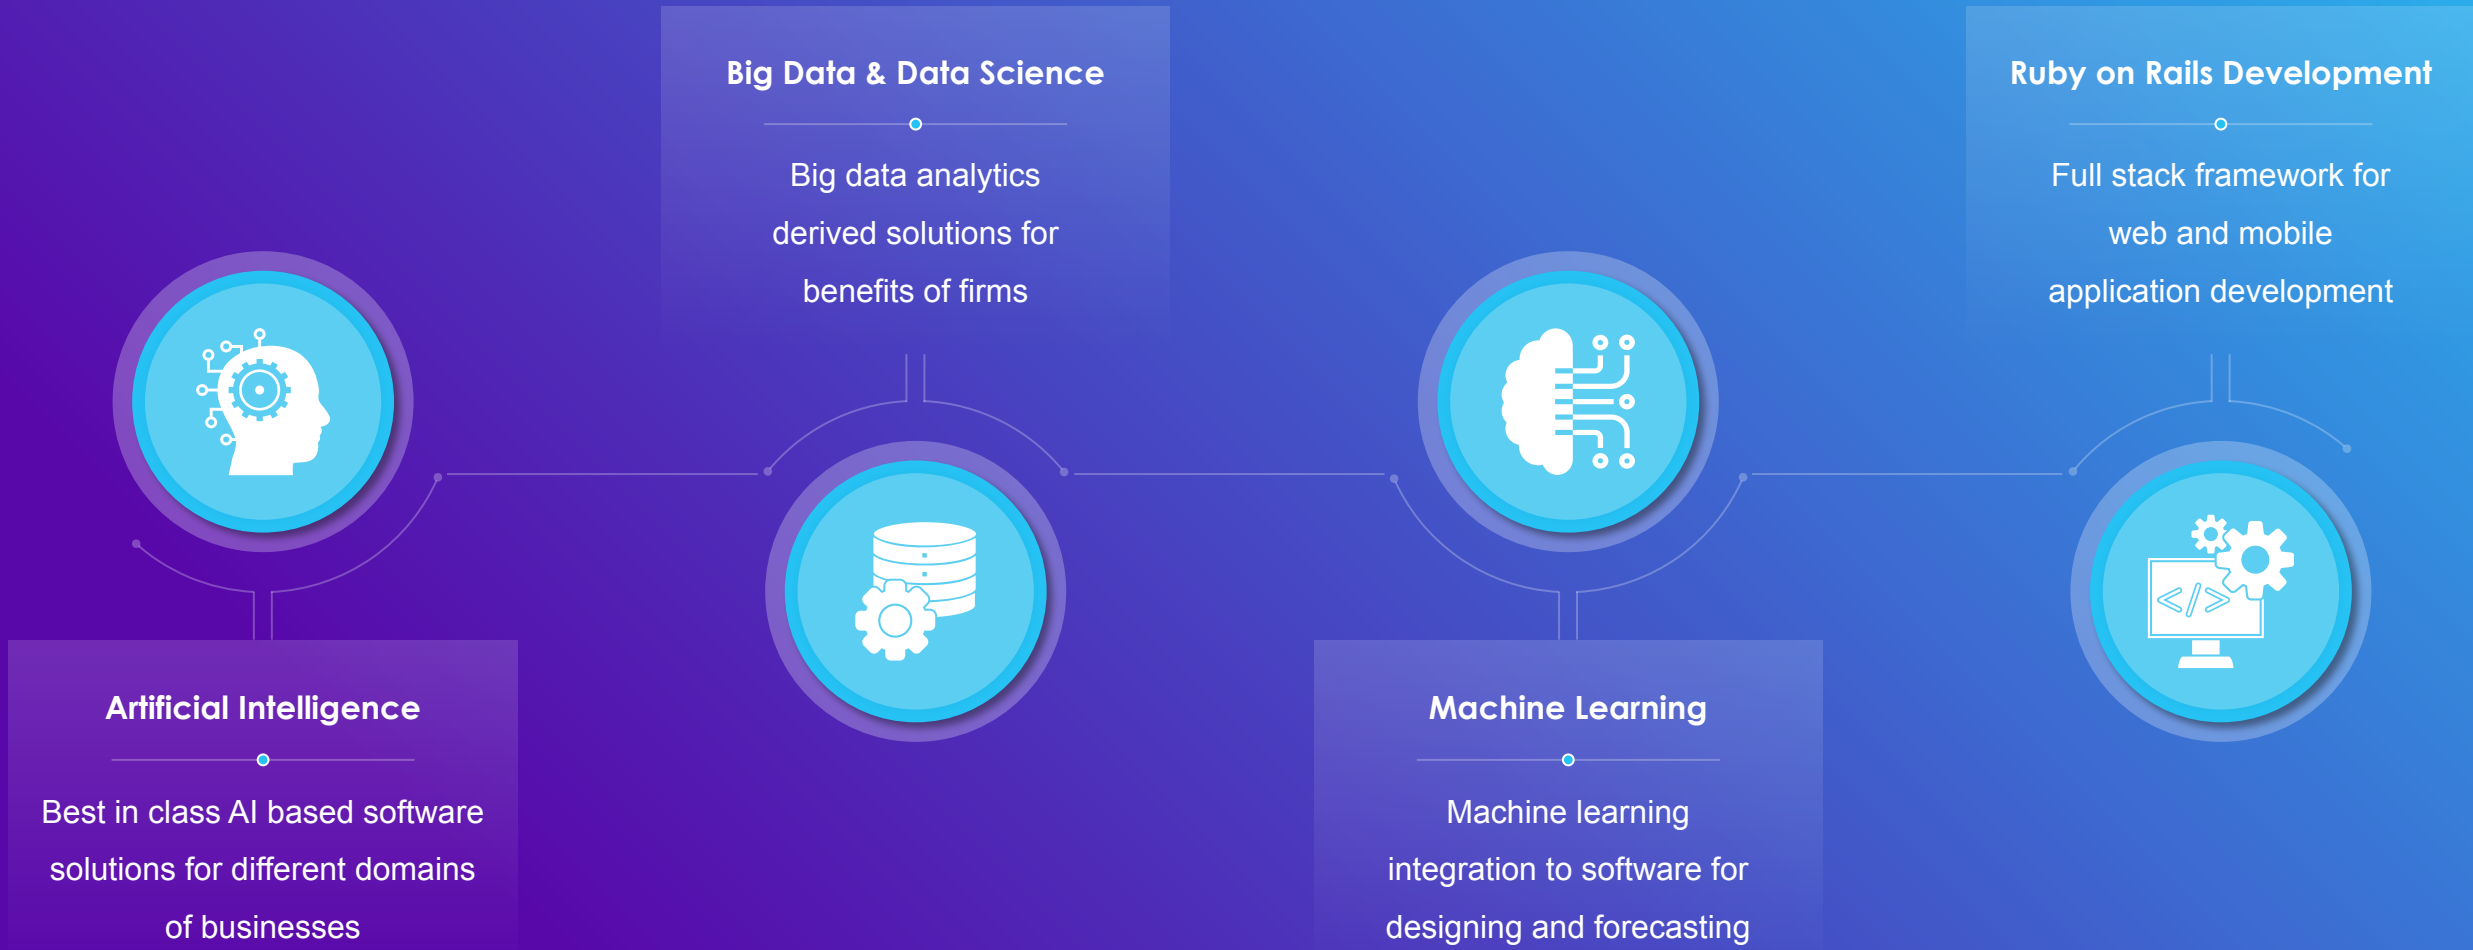

“Software and application development code review and debugging”

Our technologies

This slide showcases the latest technologies leveraged in organisation to provide improved the services and new solutions. The latest technology includes Artificial Intelligence, Big Data & Data Science, Machine learning and Ruby on Rails Development.

[Click here to get the PPT template!!](#)

Ruby on rails technology

This slide highlights the four categories of solutions and services developed on Ruby on Rails technology. It showcases minimum viable product development, API integration, custom portals, ecommerce stores and social networks

Low Cost Software

Minimum Viable Product Development

Low-cost product development
for small businesses

Customized Software

Custom Portals

High load web portals for
audio-visual performance

Software Modification

API Integration

API integration with web
services to build high load
data systems

Standard Software

E-commerce Store

Custom ecommerce development
with
modular approach

Social Networks

Social media and other
membership
project development

[Click here to get the PPT template!!](#)

Machine learning technology

This slide showcases tools and solutions for predictive modelling, natural language processing and artificial vision developed by leveraging machine learning technology. It highlights prediction tools, forecasting tools and chatbots.

Predictive Modelling

- CLV prediction tool
- Churn rate prediction model
- Demand forecasting

Natural Language Processing

- Intelligent chatbots
- Behavior analytics
- Document sorting

Artificial Vision

- Scene categorization
- Image processing
- Item detection

[Click here to get the PPT template!!](#)

Big data analytics

This slide showcases data engineering, database management, data visualization and multi system data integration tools and software developed with assistance of big data analytics and processing.

Data Engineering

Data processing tools
Data analytics software

Database Management

Data storage for easy
accessibility
Data encryption

Data Visualization

Data
visualization tools
Interactive dashboards

Multi System Data Integration

Multiple system data
collection
Data integration

[Click here to get the PPT template!!](#)

This slide showcases recommendation engines, sales intelligence and classification system category tools developed through artificial intelligence technology. The tools includes interaction analysis, behaviour analysis and trend prediction tool.

Recommendation Engines

- Product and services recommendation software
- Customer interaction analysis tools

Sales Intelligence

- Client behavior analysis tools
- Customer choice trend prediction tools

Classification System

- Pattern classification solution
- Source tracing and identification tools

Business model canvas

The slide depicts the business operations and revenue generation framework which illustrates key partners, key activities, key resources, value proposition, customer relationships, channels, customer segments, cost structure, and revenue stream

Key Partners

- Research and development partners
- Software retailers
- Open-source developers
- Add text here

Key Activities

- Software development
- Application design
- IT consulting
- Add text here

Key Resources

- Experienced human capital
- Large user base
- Add text here

Value Proposition

- AI & ML solutions
- Customized IOT implementation
- MVP development for startups
- Code audit services
- Add text here

Customer Relationships

- Enterprise sales and support
- Customer conference
- Annual tech meetings

Channels

- Website
- On call support
- Software retail stores
- Add text here

Customer Segments

- Corporate houses
- Big technology companies
- Manufacturing industries
- Hospitals
- Add text here

Cost Structure

- Software development cost
- Research and development cost
- Infrastructure maintenance cost
- Employee salaries

Revenue Streams

- Product sales
- Tools and platforms annual subscription fees
- Consultancy services
- Add text here
