Challenges faced by financial companies during adoption of AI

This slide represents key challenges faced by fintech companies during the adoption of AI. It includes data quality, weak core structure, lack of standardization, lack of talent in workforce and huge investment.

01 — Data quality and weak core structure

- Data sets that are third party, unstructured and lack due diligence makes it difficult for AI to identify overlapping and conflicting entries
- Lack of support for AI specific scale and volume in existing financial framework
- Add text here

02 — Lack of standardized processes and guidelines

- Fragmented data assets hampers collaboration between business and technology teams
- Add text here

03 — Lack of skills

- Lack of skilled talent can create hinderance for organization in implementing AI
- Unskilled employees can face difficulty in managing different AI-based processes of organization
- Add text here

04 — Huge investment

- Implementation of AI in an organization required huge amount of budget and resources
- Some businesses may find it difficult to cover the deployment and maintenance cost for AI technology
